- (section 6.2: the law of cosines) 6.12 part d: what must be true of all triangles? we assume that a , b , and c
are angles whose degree measures are strictly between 0 and 180 . the 180 rule, the triangle inequality, and
the "eating" rule from notes 6.02 still apply. part e: cases remember that the law of sines is applied in cases
where you know two angles and one **trigonometry 12.1 geometry - agmath** - trigonometry geometry 12.2
practice: solve each. 1. the legs of a right triangle are 3.9 and 8 inches long. what are the measures of the
angles? 2. an isosceles triangle has 20o base angles and a 4-inch base. find its area. **chapter 2: concurrent**
force systems - university of pittsburgh - department of mechanical engineering characteristics of forces
force: vector with magnitude and direction magnitude - a positive numerical value representing the size or
amount of the force directions - the slope and the sense of a line segment used to represent the force -
described by angles or dimensions **trig cheat sheet - lamar university** - ©2005 paul dawkins trig cheat
sheet definition of the trig functions right triangle definition for this definition we assume that 0 2 p
